### Restriction and Election

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to a process for the oxidation of p-xylene to terephthalic acid comprising oxidizing in the liquid phase in the presence of a catalyst, classified in class 562, subclass 412 .
- II. Claims 22-28, drawn to a catalyst composition comprising nickel, manganese, and bromine, classified in class 502, subclass 103.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention of Group II , the catalyst composition comprising nickel, manganese, and bromine, can be used to make the chiral cyanoamines as shown in Hoyeyda et al (US 6,693,168) ,which describes that the catalyst composition comprising nickel, manganese, and bromine can be used

Art Unit: 1625

to make the chiral cyanoamines unlike the invention of Group I, the process for making terephthalic acid by the oxidation of p-xylene to catalyst.

The subcombination has separate utility such as the preparation of the chiral cyanoamines as shown in Hoyeyda et al (US 6,693,168). Therefore, in the instant case, they are two different inventions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Dennis Carmen on 7/21/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Taylor Victor Oh whose telephone number is 571-272-0689. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cecilia Tsang can be reached on 571-272-0562. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
